DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn. The amendments presented in communication filed on September 5, 2003 have been entered.

Allowable Subject Matter

2. Claims 13-16 are allowed.

3. The following is an examiner's statement of reasons for allowance.

Buttrick et al. discloses the construction of a miniature AC motor having a dual wire stator coil, the dual wire stator coil having at least two wires co-axially wound together, each one of the wires having opposite first and second ends extending out from the dual wire stator coil, wherein the at least two wires have their first and second ends connected in series.

Nagel et al. teaches the construction of an enameled wire for the purpose of having a wire that holds the turns of wound wire in contact with each other and provides excellent external protection of the finished winding.

Muller et al. teaches the use of an IC coil driver, wherein two terminal ends of the coil are respectively adapted to be connected with two output ends of a drive IC, which outputs alternating current at terminal ends of the coil for the purpose of energizing a flat coil.

Pleiss teach the construction of a dual wire stator coil having two co-axially wound wires with their first and second ends connected in parallel, and the stator coil being formed as a uni-coil winding for the purpose of allowing separate interconnection to other conductors of other coils of the motor stator.

Art Unit: 2834

The prior art of record, taken alone or in combination, fails to teach the construction of a dual wire stator coil for a brushless direct current motor radiator fan as described on independent claim 13, wherein:

the at least two enamel wires are connected in such a way that a uni-coil and a dual coil winding are selectively formed; and

the winding is connected with a drive IC that outputs alternating current to the winding, and further connects to a Hall IC.

Dependent claims 14-16 are considered allowable by their respective dependence on allowed independent claim 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
